

**Proceedings of CIE 2010 "Lighting Quality & Energy Efficiency"**  
14-17 March 2010, Vienna, Austria

In March 2010 the Lighting Quality & Energy Efficiency Conference took place in Vienna, Austria. The event gave academics, lighting industry professionals, designers, researchers and representatives of regulatory authorities the opportunity to discuss best practice and the latest developments in the field of light and illumination. Recommendations were also made for reducing the amount of energy used for lighting. One of the hottest topics at the conference was light emitting diodes (LEDs), which offer significant environmental and energy-efficiency benefits compared with conventional light bulbs and energy-saving lamps. The Proceedings of this Conference include invited papers and contributed papers as well as papers on the poster presentations.

The publication consists of 845 pages including 146 contributions with some 700 figures and 223 tables. CIE x035:2010 is readily available via the website of the CIE Central Bureau ([www.cie.co.at](http://www.cie.co.at)).

The price of this publication is EUR 180 (Members of the national CIE organizations get 50% discount).
