

## **CIE Draft Standard DS 021.2/E:2010**

This Draft Standard specifies a method to accurately and reliably assess the photometric performance of vehicle headlighting systems, to enable the performance of different systems to be compared. The requirements are given in relation to road scene illumination and the limitation of glare, and the performance is assessed using parameters relevant to lane guidance and the detection of pedestrians and objects.

The Draft Standard includes a measurement and calculation procedure. It does not specify the format of an assessment report.

The Draft Standard has been sent to CIE National Committees for comments and sales to interested parties. It is still subject to changes and may not yet be referred to as a CIE Standard. When approved by the CIE NCs, it will be published as a CIE Standard and later on as a joint ISO/CIE Standard.

Price of this Draft Standard: 56,- (Members of the National Committees of the CIE get 50% discount).
