

Proceedings of the CIE Expert Symposium on

Advances in Photometry and Colorimetry

CIE x033:2008

The CIE Expert Symposium, organized by CIE Division 2 and hosted by INRIM (Istituto Nazionale di Ricerca Metrologica) in Turin, Italy, covered the following areas:

- Imaging Photometers and Colorimeters
- Spectral Responsivity Measurement and f_l of Photometers
- LED Measurement and Characterization
- Goniophotometers and other developments

A Keynote paper on “Goniophotometry: New Challenges and Novel Solutions” was given by Georg Sauter of PTB (DE).

The outcomes of the symposium will be utilized as recommendations for future work in Division 2.

The Proceedings include the Keynote paper, 29 papers and 13 posters presented during the Symposium.

The Proceedings consists of 228 pages with 318 figures and 49 tables. The price of this publication is EUR 128,— (Members of the National Committees of the CIE get 50% discount).
