

MUMBAI STATE CENTRE

Lecture on Lighting Design

January 27, 2013, Mumbai

In this very interesting session, the 8th in the Breakfast with Light series, Mr. Bhagwan Shirsekar extensively covered the subject of Lighting Design for Green Building Commercial Interiors. He illustrated the need of developing lighting concepts, design layout, BOQ, etc. as per LEED / Griha / IGBC norms and complying with ECBC and IS. Stress was laid on the need for understanding the requirements of the client and also to help them and the architect to develop energy efficient green buildings during design, development and operation stage, through implementation of good lighting design/ lighting control, system integration and integration with BMS.
