

MUMBAI STATE CENTRE

Breakfast with Light 4

September 30, 2012

*Subject: Automation and Lighting Control...Technology for Tomorrow*

*Speaker: Mr. Sudhir Kamat, Director, Raylogic Control Systems*

The need for automation and its advantages in bringing lighting control at our finger tips along with energy efficiency was highlighted. Different light sources and their dimming techniques were illustrated. Protocols used for lighting control and their comparative advantages were explained. Need for interaction of the Architect with the Lighting consultant, right from the design stage for successful implementation of automation was expressed.
